TARUNA D

Mysore, Karnataka, India | +91 6363773907 | tarunbasavaraj00@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Computer Science undergraduate and full-stack software developer with hands-on experience building full-stack applications using Java, Spring Boot, React, and MongoDB. Skilled in designing REST APIs, building responsive frontend interfaces with React, HTML, CSS, and Bootstrap, integrating cloud storage (AWS S3), and delivering secure, scalable web applications. Strong foundation in object-oriented programming and SQL, with a track record of shipping complete personal projects from frontend to backend to deployment.

EDUCATION

Maharaja Institute of Technology, Thandavapura – Mysore, India *2023 – Present*
Bachelor of Engineering – Computer Science | CGPA: 7.8

Hiremegalagere Patil Siddana Gouda PU College – Vijayanagara, Karnataka *Apr 2020 – Mar 2022*
Pre-University Course – Science | 83%

KBG High School – Bennihalli, Vijayanagara, Karnataka *2020*
SSLC | 84.64%

TECHNICAL SKILLS

Languages & Core: Java, SQL, Object-Oriented Programming (OOP)
Backend Development: Spring Boot, REST APIs, Maven, MongoDB, AWS S3
Frontend Development: React.js, JavaScript, HTML5, CSS3, Bootstrap 5
Tools & Platforms: Git, GitHub, Postman, IntelliJ IDEA, VS Code

EXPERIENCE

Software Developer (Fresher) *Mar 2026 – Present*

- Developed backend services using Spring Boot and REST APIs for production-style applications.
- Designed API endpoints and model inference workflows using Flask and Spring Boot.
- Worked with JSON, HTTP requests, and API integration to connect frontend and backend services.
- Built responsive frontend interfaces using React, HTML, CSS, and Bootstrap to deliver seamless user experiences.

PROJECTS

FOODIES – Full-Stack Food Delivery Application | GitHub
Spring Boot, React, AWS S3, MongoDB, Bootstrap

- Developed a full-stack food delivery application with a responsive React frontend and Spring Boot backend for seamless online food ordering.
- Implemented user authentication, restaurant and menu browsing, shopping cart management, and secure order placement using RESTful APIs.
- Integrated MongoDB for scalable NoSQL data storage and AWS S3 for secure cloud-based image storage and retrieval, improving application scalability and media management.

CloudSnap – Temporary Image-Sharing Platform | GitHub
Spring Boot, React, AWS S3, MongoDB, Bootstrap

- Built a full-stack temporary image-sharing platform using React, Spring Boot, and MongoDB, featuring JWT-based authentication and secure file storage on AWS S3 with presigned URL access control.
- Designed a self-expiring share-link system with configurable TTLs (5 minutes to 24 hours) and a scheduled cleanup job that automatically purges expired images from S3 and MongoDB, ensuring zero storage bloat from unclaimed uploads.
- Implemented per-user resource management, enforcing a 5-image storage cap via server-side validation, along with RESTful APIs for upload, retrieval, and deletion secured with stateless JWT authorization.

SkyLine – Real-Time Weather Application | GitHub
Spring Boot, React (Vite), Bootstrap, CSS, OpenWeatherMap API

- Built a full-stack real-time weather app using React + Vite + Bootstrap 5 on the frontend and Spring Boot on the backend.
- Designed a secure backend proxy that keeps the OpenWeatherMap API key server-side, delivering current conditions, 5-day forecasts, and dark/light mode.
- Delivered a fully responsive, glassmorphism UI with animated icons, local storage persistence, and clean error handling.

CERTIFICATIONS

- Java Spring Framework & Spring Boot – Udemy (Navin Reddy, Telusko Edutech), 2026
- Google Cloud Career Launchpad – Cloud Engineer Track, Google Cloud Learning Services, 2026
- Machine Learning for Engineering and Science Applications – NPTEL IIT Madras, 2026
